BESCHREIBUNG

Start your weekly English training and get fit with "Conversation & Communication".

This active training is designed to gradually improve your practical language skills and boost your confidence for English speaking situations. In the first 30 minutes of each session, we will discuss interesting topics (general & workrelated) and explore the English-speaking world together. In the second part, you will practice relevant challenges from your work life – emails, telco's, meetings et al. A systematic review of practical grammar and typical mistakes can be integrated into the course programme upon request.

On request, participants will receive a certificate of participation after attending at least 80 % of the classes.
